later mails, is not promising. There appears to be no revival in the demand for goods, notwithstanding the reduced production and small stocks. The distress among those out of work is showing itself by a decided increased demand upon the poor-rates, the number relieved weekly being nearly ten thousand persons. In this respect Manchester may be taken as an indication of the state of the cotton districts generally, and there is little doubt that, as the savings and other means of the unemployed operatives become exhausted, the demand on the Relief Board will increase. But if we should say that any particular one was best, we should say more than we believe, and more than would be pleasing to any one of the "rejected." Therefore, all we say is, "Where is Newark?"

APPROACH OF HOT WEATHER .- The weather yes terday might be characterized as something more than warm; from noon until near sunset it was decidedly hot; overcosts were superfluous, and the la-dies thronged Broadway in their full Spring attire. One or two we saw with fur capes and muffs, and heavy garments, as though it were Midwinter. At Delatour's, the thermometer marked 72° in the shade at 3 p. m., between twenty and thirty degrees hotter than on the same day for some years past. The warm weather of this week has given a start to vegstation. The grass in the Hospital Yard is quite green, and the trees in the Parks are beginning to bad.
